My approach to atypical melanocytic lesions

Warfarin reversal

Use of tissue microarray for interlaboratory validation of HER2 immunocytochemical and FISH testing

Tenascin C expression is upregulated in pancreatic cancer and correlates with differentiation

The metabolic marker tumour M2-PK shows increased expression along the metaplasia–dysplasia–adenocarcinoma sequence in Barrett's oesophagus

Recurrent chromosomal imbalances and structurally abnormal breakpoints within complex karyotypes of malignant peripheral nerve sheath tumour and malignant triton tumour

Expression of ATM, p53, and the MRE11–Rad50–NBS1 complex in myoepithelial cells from benign and malignant proliferations of the breast

Molecular strain identification of the *Mycobacterium tuberculosis* complex in archival tissue samples

Karyometry detects subvisual differences in chromatin organisation state between non-recurrent and recurrent papillary urothelial neoplasms of low malignant potential

First published in 1945, Journal of Clinical Pathology is a core publication for workers in all fields of clinical pathology. Published monthly, it features high quality leaders, original papers, and short reports.

Research areas covered are: histopathology; haematology; microbiology, cytopathology; clinical pathology, molecular pathology, forensic pathology, dermatopathology; neuropathology; and immunopathology.

The image representing chemical pathology (the image) is published with the kind permission of the Swiss Institute of Bioinformatics (copy at Swiss Institute of Bioinformatics, Geneva, Switzerland). Courtesy of Amersham Biosciences.
